

# Daeho Kim

 Integrated MS-PhD student, Kyung Hee University, Korea Republic of.

 kdh2769@khu.ac.kr

 (+82) 10 9886 2714

 Daehow

 AIRLAB

## Research Interest

My primary research interest lies in **Embodied AI**. I have been focusing on foundational research to develop autonomous robots and aspire to conduct meaningful research towards a world where humans and robots coexist harmoniously.

## Education

**Kyung Hee University** Gyeongi-do Korea  
M.S. - Ph.D in Software Convergence Sep. 2023 - Present

**Kyung Hee University, Republic of Korea** Gyeongi-do Korea  
B.S. in Software Convergence Mar. 2018 - Aug. 2023

- Majored in Robot & Vision Track
- Leave on absence due to military service (Jan. 2019 - Aug. 2020)  
**Assistant Instructor**, Ranger Training Unit, Republic of Korea Army Infantry School

## Publications

### International papers

- [1] Camera-LiDAR Extrinsic Calibration using Constrained Optimization with Circle Placement  
*IEEE Robotics and Automation Letters (RA-L)* Vol. 10, Issue:2, pp. 883-890, 2025.  
(Presentation at ICRA 2025 in Atlanta)  
**Daeho Kim**, Seunghui Shin and Hyoseok Hwang\*
- [2] PAIR360: A Paired Dataset of High-Resolution 360° Panoramic Images and LiDAR Scans  
*IEEE Robotics and Automation Letters (RA-L)* Vol. 9, Issue:11, pp. 9550-9557, 2024.  
(Presentation at ICRA 2025 in Atlanta)  
Geunu Kim, **Daeho Kim**, Jaeyun Jang, and Hyoseok Hwang\*
- [3] Moving End-Effectors by Deep Reinforcement Learning for Better Hand-Eye Calibration Performance  
under review, 2025  
Seunghui Shin, **Daeho Kim**, and Hyoseok Hwang\*

### Domestic papers

- [1] Performance Validation of Target-based Camera-LiDAR Extrinsic Calibration on Simulation  
Summer Annual Conference of KIBME (special session), 2024  
**Daeho Kim**, and Hyoseok Hwang\*

## Projects

### Pick and Place system with 6-DOF Pose Estimation using DOPE

- Pick and Place / 6-DOF Pose estimateion / Domain Generalization

### Camera-LiDAR Extrinsic Calibration using an Ordinary Box

- Extrinsic Calibration / Sequential-RANSAC

### Stereo RGB camera 3D reconstruction

- Stereo Calibration / 3D Reconstruction

### Turtlebot Manipulation with Optical Flow in Gazebo Simulation

- Optical Flow / Teleoperation

## Academic Experience

---

### Teaching Assistant | Kyung Hee University

Gyeonggi-do Korea

- 3D Data Processing (SWCON36600)
- Robot Programming (SWCON33100)

Spring Sem. 2024.  
Fall Sem. 2023.

### Silicon Valley Software Program | San Jose State University

California USA

- Silicon valley software innovation & Technology contest

Jan. 2021 - Feb. 2021

## Skills

---

- Sensors - LiDAR, 360° camera, Fisheye camera, RGB-D camera, GPS, IMU
- Programming - Python, C/C++
- Simulator - Gazebo, IsaacSim
- Frameworks - ROS, Open3D, OpenCV, PCL, PyTorch

## Languages

---

 Korean - Native

 English - Business Competence
